

Lloyds of London Marble – Segmented Rounds

Very attractive segmented rounds of marble, obtained as part of a larger lot of marble removed from the famous Lloyds of London Building. These rounds would have held central positions within larger marbled rooms, creating a really attractive focal point. Six available. The rare and very expensive white grained Arni marble, as these are from, was the principal material used throughout the Lloyds of London interior.

DIMENSIONS (cm):

Overall Diameter 108cm Thickness is 2cm, Central Circle Diameter 23cm
